

Product Data Sheet
ELECTROCHEMICAL PH-20 SENSOR (4 SERIES) (P/N: 060-0000-000)

• Description
The sensor is designed for the measurement of PH₂ concentration in gas phase. It can be used as the pin to pin replacement of the standard 4 series electrochemical PH₂ sensor.

• Performance Characteristics
Nominal Range: 0~20 ppm
Maximum Overload: 100 ppm
Sensitivity (20 °C): 1.4 ± 0.6 μA/ppm
Response Time (T90): ≤ 30 s
Zero Signal (20 °C): < ±0.4 μA
Baseline Shift (-20 °C ~ 50 °C): <1 ppm
Resolution: 0.1 ppm
Linearity: Linear up to 20 ppm
Bias Voltage: 0 mV

• Environmental
Temperature Range: -20 °C ~ 50 °C
Pressure Range: 1 atm ± 10 %
Humidity Range: 15 % ~ 95 %RH non-condensing

• Life Time
Long Time Output Drift: < 2 % signal/month
Recommended Storage Temp: 10 °C ~ 30 °C
Expected Operating Life: 2 years in clean air
Storage Life: 6 months in original packaging
Warranty: 12 months

• Intrinsic Safety Data
Maximum Current at 100 ppm PH₂: < 0.2 mA
Maximum O/C Voltage: 1.3 V
Maximum S/C Current: <1.0 A

• Physical Characteristics
Housing Material: ABS
Weight (Nominal): 5 g
Orientation: None

• Installation
Output signals from the sensor pins are different. Inappropriate use of the pins in product design will affect sensor functionality. Exposure to high concentrations of solvent vapors should be avoided under any condition. Mechanical over stress may cause deformation or cracks of the plastic enclosure of the sensor. If the sensor is used in extreme environmental conditions, please contact SemeaTech for more details.

Note
The performance data in this document is conducted by using SemeaTech recommended test circuitry and test environment at 20 °C, 50 %RH and 1 atm. Sensor performance varies under different environmental conditions, please contact SemeaTech for more details.

All dimensions in mm
All tolerances ±0.10 mm unless otherwise stated.
Cross-Sensitivity Data

Safety Note

The sensor is designed to be used in certain instruments for life critical applications. To ensure the sensor functioning per its specifications inside the instrument, it is required to read the instrument user's guide carefully and comply with the calibration procedures by using certified target calibration gas before each use. Failure to do so may cause serious injury and fatality. Please do not open the housing because the electrolyte stored inside is harmful.

It is highly recommended for customers to validate the sensor performance using this document as a reference for their product designs or applications.
