- **Intrinsic Safety Data**
  Maximum Current at 2000 ppm H₂: < 0.2 mA
  Maximum O/C Voltage: 1.3 V
  Maximum S/C Current: <1.0 A

- **Physical Characteristics**
  Housing Material: ABS
  Weight (Nominal): 8 g
  Orientation: None

- **Installation**
  Output signals from the sensor pins are different. Inappropriate use of the pins in product design will affect the sensor functionality. Exposure to high concentrations of solvent vapors should be avoided under any condition. Mechanical overstress may cause deformation or cracks of the plastic enclosure of the sensor. If the sensor is used in extreme environmental conditions, please contact SemeaTech for more details.

• Safety Note

The sensor is designed to be used in certain instruments for life critical applications. To ensure the sensor functioning per its specifications inside the instrument, it is required to read the instrument user’s guide carefully and comply with the calibration procedures by using certified target calibration gas before each use. Failure to do so may cause serious injury and fatality. Please do not open the housing because the electrolyte stored inside is harmful. It is highly recommended for customers to validate the sensor performance using this document as a reference for their product designs or applications.
