Dual Channel Low Noise Current Amplifier

■ Dual Channel Amplifiers

Dual Channel Low Noise Current Amplifier

Features	<ul style="list-style-type: none"> • Two Separate Channels in One Compact Housing • Transimpedance (Gain) 1×10^5, 1×10^7 and 1×10^9 V/A • Transimpedance (Gain) Individually Switchable for Channels A and B by Opto-Isolated Control Interface • Bandwidth DC ... 2 kHz • Fast Switching Time of Typically 1 ms between Gain Settings • Protection Against ± 3 kV Transients 																																											
Applications	<ul style="list-style-type: none"> • Dual Channel Photodiode Amplifier • Spectroscopy • Beam Monitoring for Particle Accelerators / Synchrotrons • Ionisation Detectors
