## **Diamond Like Coating (DLC)**

If the filter application requires Abrasion resistance, EOC can provide a diamond like coating (DLC) on the surface. This will resist damage to the filter coatings. If your application requires this, please let us know.

## **Metalized Filter Edges**

Certain applications require a solder seal of the filter to a metal package. This solder seal can provide a hermetic package. To make the filter solderable, a metal coating is put on the edge of the filter and the edge of the filter surfaces. If this is a requirement please let us know.
