UV - Photodetector with integrated amplifier

**characteristics:**
- spectral range: 210 ... 390 nm
- active area: 0.965 mm²
- responsivity, decadic staggering: 1,2/12/120 mV/nW
- extra sensor pin for external adjustment of gain and bandwidth
- single supply voltage
- sensor assembly isolated to ground
- hermetically welded TO5-metal/glass package
- components are in conformity with RoHS and WEEE

**applications:**
- selective UV-measurement
- control of sterilization lamps
- flamedetection and flamecontrol
- control of irradiancy in varnish and adhesive hardening

**absolute maximum ratings:**

package dimensions

- If an external resistor for reduction of gain is used, please make sure that length of connectors is as short as possible to reduce noise and capacitive interference.

- If internally adjusted gain is used only, please cut pin "1".
