## FOR IMMEDIATE RELEASE

November 2014

Santa Rosa, CA.

### **greenTEG Small Radiation Sensor**

greenTEG AG has developed a new small thermal sensor for radiation measurements. At just 4.4 x 4.4 mm square the gSKIN<sup>®</sup> XB 45 9R is small enough for any application. Its features include:

- Highly scalable for high volume applications
- Small and easy to integrate
- Sensitive, linear output
- Wide power range without saturation
- Broadband thermal detector
