Micro-Hybrid Hermeseal® Hermetic Packaging for NDIR Components

Micro-Hybrid has developed the Hermeseal® hermetic packaging for NDIR components; pyroelectric and thermopile detectors and IR sources. The Hermeseal® hermetic packaging is needed for applications where:

- Low molecular weight gases like krypton that leak through an epoxy seal are used for high performance (Higher D* detectivity in detectors and higher output in IR sources)
- High temperature applications.
- The high temperature of the IR sources needs to be isolated from explosive gases.

Micro-Hybrid NDIR components (pyroelectric and thermopile detectors and IR sources) are distributed in North America by:
