# Applications Waste Water

During biological wastewater treatment,  $N_2O$  is produced in the nitrification-denitrification phase, which be converted into harmless nitrogen gases. And also considering on the GHG issue,  $N_2O$  shall be measured.

- 3-gases in one NDIR gas sensor
- Internal compensation to eliminate cross sensitivities
- $CO_2$  4%/10%/20%,  
 $N_2O$  300/500/1000ppm  
 $CH_4$  500/1000ppm
